

I respectfully urge the FCC to reject the NAB's petition 04-160. I am a satellite radio subscriber who pays for a service. I am able to access information when I want it, and don't have to be dependent on being in my car at a certain time to get the necessary information I need. If the public broadcasters are so worried about fair competition, than they should make a better effort to improve their service. Less commercials and more relevant information when I need it. If they had done this to begin with, there may never have been a need for satellite service. However since they did not do their job, I am more than happy to pay someone who gives me what I need.
